DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 11, 12, and 18-25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 33-42 of U.S. Patent No. 6,669,687 B1. Although the conflicting claims are not identical, they are not

Art Unit: 3735

patentably distinct from each other because they are directed to analogous methods for treating tissue near a valve to modify flow through the valve.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11, 12, and 18-25 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over St. Goar et al. U.S. Patent No. 6,629,534 B1.

St. Goar et al. disclose a method for treating a cardiac valve, such as valvular regurgitation, the method comprising the steps of:

advancing a catheter to a cardiac valve to be treated (see col. 3, lines 53-55); and delivering radiofrequency energy to the valve annulus to heat the annulus so as to treat valvular regurgitation (see col. 5, lines 41-46).

St. Goer et al. further teach that treated cardiac valve is selected from the group consisting of tricuspid valve, mitral valve, and aortic valve (see col. 1, lines 53-57 and col. 3, lines 32-36).

As to claims 24 and 25, although St. Goer et al. teach the use of alternative forms of energy to perform the treatment, they do not teach the use of chemical energy.

However, one skilled in the art at the time of the applicant's invention would have used chemical energy as an equivalent alternative form of energy to perform the treatment.

Allowable Subject Matter

Claims 13-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
